We are IDST!

A group of makers, artists, techies and experimenters working together to make community artworks. Creating artworks, performances, games and events that are playful, purposeful and people-powered and celebrate community strength. Collaborating with others, training and running experiments, workshops, and projects so people can learn and get involved and communities can own their ideas.

Message in Lights

We were asked by LIT Festival and Macclesfield Town Council to come up with a Covid safe way for people to celebrate Christmas and engage with the tree. In previous years, messages have been written on stars and hung on the tree. This year we decided to add an interactive, digital element that could appeal to old and young alike. Message in Lights enables you to send a text message to the tree, which will be displayed as Morse code on a unique bulb, selected just for you, for the whole of Christmas. We know most people can't read Morse code but we have made a cheat sheet to get you started.

We have worked very hard to get the tree and lights ready to accept your messages. We hope you enjoy taking part in Message in Lights.

Merry Christmas from all of us at IDST!
